

There are a wide range of uses for real time person at manifestations -

We can use Liquid Galaxy to track people moving on roads in a particular region through the GPS in their mobile phones to determine the traffic of a particular area. It would look something like this-

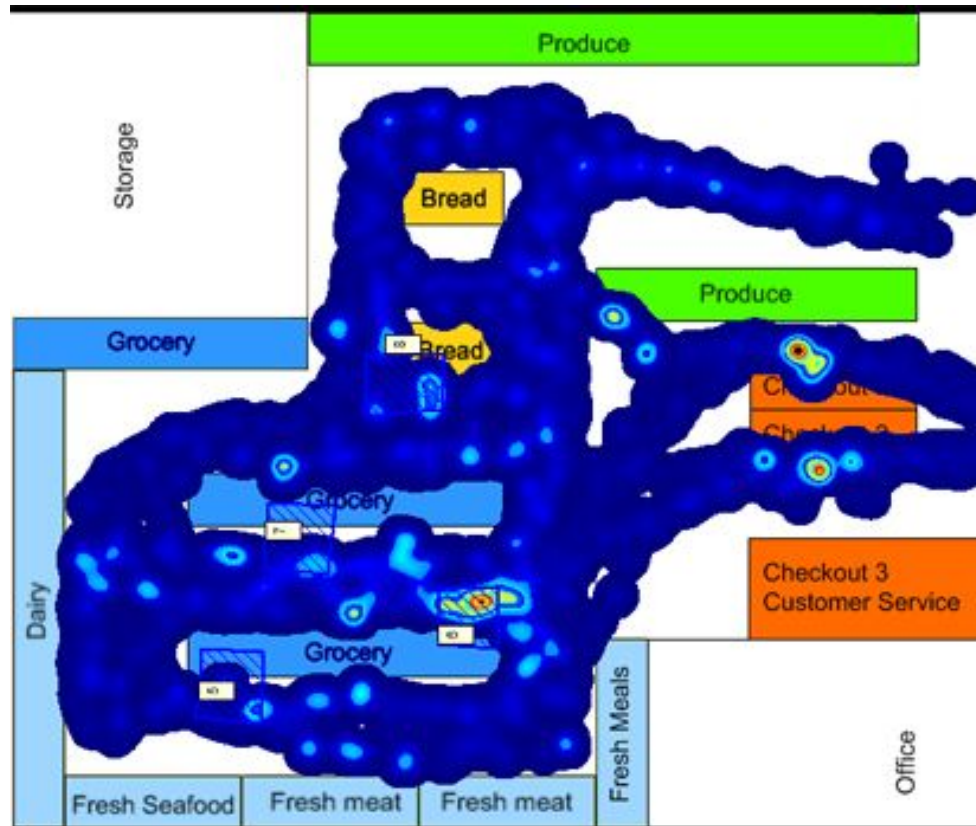

During an important event like the president of your country giving a speech in a particular hall, we can track people present near him to provide the safety measures. It would be easy to manage multiple people on the panoramic screen of the Liquid

Galaxy. We can also use the security camera present in the hall for our convenience. It would look something like this -

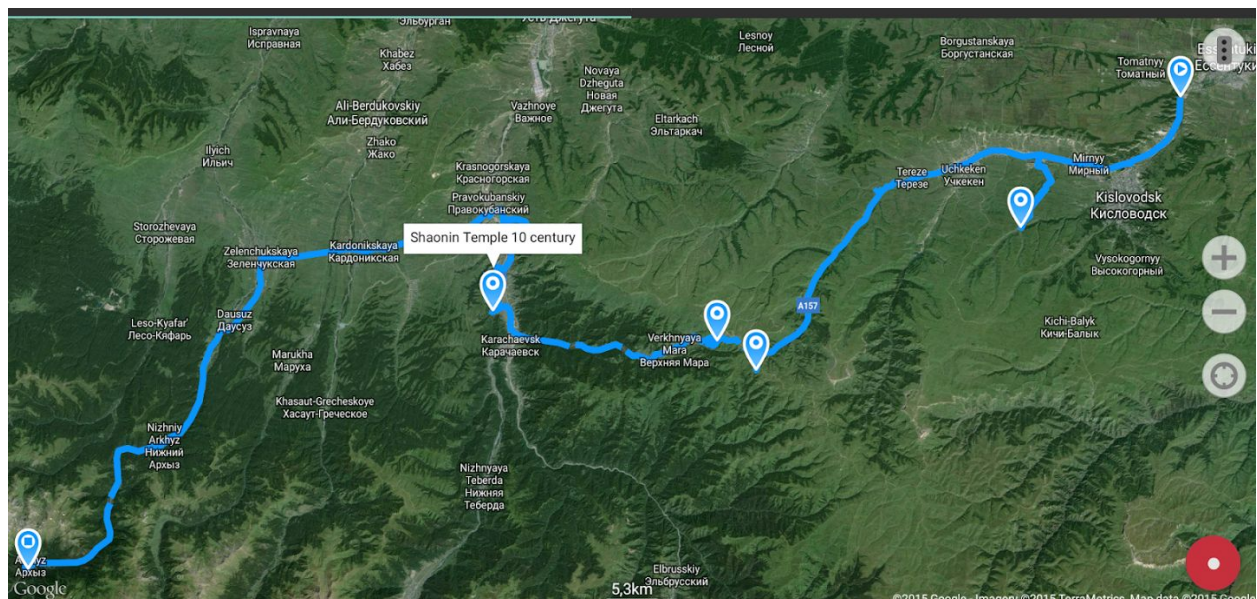

We can use Liquid Galaxy to track people inside a convenience store and can know which are the places where people visit the most. With this we can know which places are most popular and can review them on the internet. It would look something like this -

We can use Liquid Galaxy to track people in a restricted area like a military border. This way we can prevent the entry of enemies. It would look something like this -

We can use Liquid Galaxy inside a school to keep a track on students from different classes so that they are not bunking their lectures. It would look similar to these -
