

Liquid Galaxy can be used in cinema theatres for a wide range of purposes

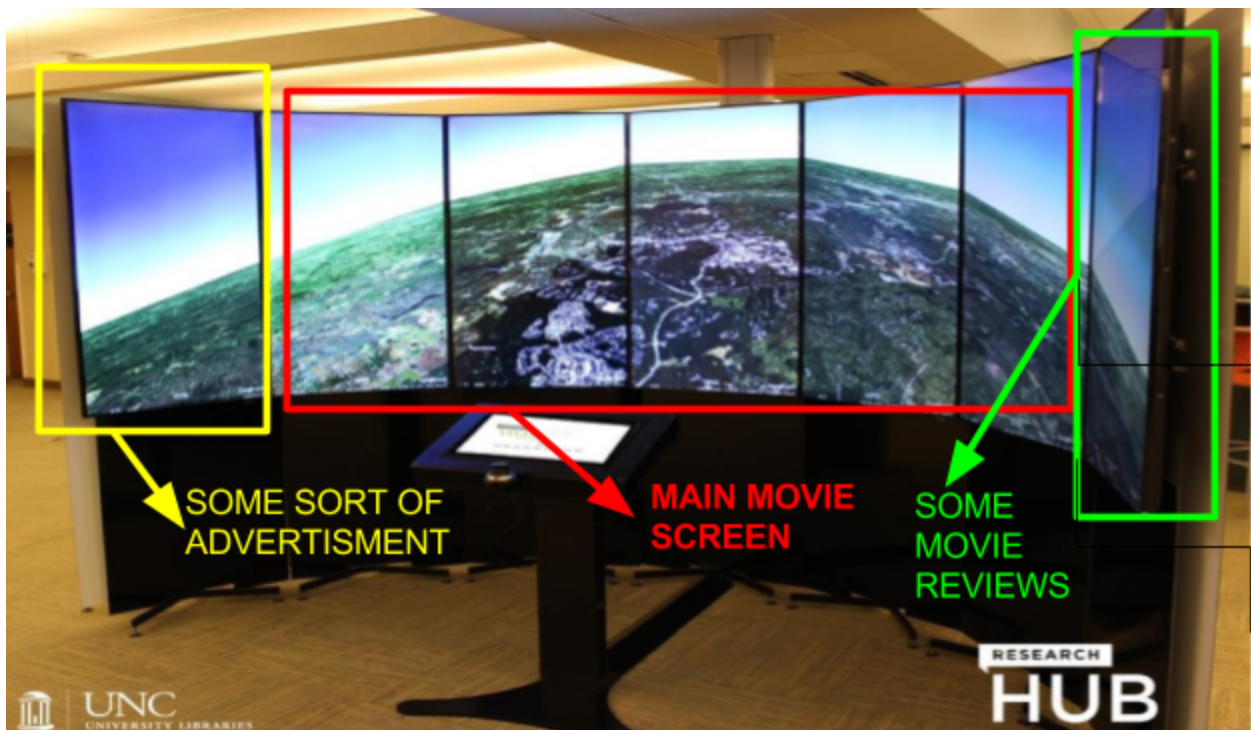

1] We can use Liquid Galaxy to view movies in a panoramic vision. This will really excite the audience and it will provide a three-dimensional perception to the movies. It would be something similar to the picture given below-

2] We can also play 3-d videos in panoramic vision with everyone wearing 3-d glasses and it would be quite a surprising experience for everyone.

3] We can also use the extreme right and extreme left screens to show components like movie reviews, advertisements etc.

4] The liquid galaxy can also be used by film makers to create and edit movies on a panoramic vision. It would be something like this-
